

SurveyMonkey Subprocessors

Last updated: December 2, 2025

If you wish to receive email notifications of updates to our Subprocessor List, please subscribe [here](#).

Please note that not all subprocessors are used in the provision of all of our Services. Our subprocessor list is segmented into specific SurveyMonkey services.

Subprocessors used to provide SurveyMonkey

| Sub-processor | Purpose | Personal Data | Transfer Destination | Mechanism of transfer | Supplementary Measures: Contractual, Organizational, and Technical | Risk |
|---------------|---|--|----------------------|-----------------------------------|---|----------|
| Abacus.ai | Operationalization of machine learning models | <p>Personal Data is de-identified prior to processing by Abacus.ai.</p> <p>Some metadata may remain, including IP Address, browser, operating system and device type used by the respondent.</p> | USA | SCCs and DPF | <p>Personal data is de-identified within SurveyMonkey's environment in order to minimize the personal data transferred to Abacus.ai. Access to Abacus.ai is restricted to teams who require access to fulfill the purpose described here. To learn more about PETs related to SurveyMonkey and the subprocessors that are used, please see the SurveyMonkey Privacy Whitepaper.</p> <p>Please see this resource for additional data protection measures taken by Abacus.ai.</p> | Low |
| Amazon Web | Data storage services for storing | <p>Personal data:</p> <p>Names of Individuals (First and/or</p> | USA | USA: SCCs and DPF | Please see AWS's commitments to data | USA: Low |

| Sub-processor | Purpose | Personal Data | Transfer Destination | Mechanism of transfer | Supplementary Measures: Contractual, Organizational, and Technical | Risk |
|------------------|--|---|------------------------------|---|---|---|
| Services ("AWS") | assets and database hosting; Content distribution network ("CDN") services | <p>Last Names)</p> <p>Any unique identifier that can be used to tie to a particular person in the real world</p> <p>Vehicle registration plate number</p> <p>Data of Birth</p> <p>Email Address</p> <p>Phone Number</p> <p>Physical Address (i.e. 123 Fake St)</p> <p>ZIP/Postal Code</p> <p>Apartment Numbers (i.e. Address Line 2)</p> <p>IP address</p> <p>IMSI/IMEI numbers</p> <p>MAC address</p> <p>Insurance details</p> | <p>Canada</p> <p>Ireland</p> | <p>Canada: SCCs and adequacy</p> <p>Ireland: SCCs</p> | <p>control, data privacy, and security.</p> <p>Specifically, SurveyMonkey uses the latest generation of EC2 which automatically gains the protection of the AWS Nitro System. Using purpose-built hardware, firmware, and software, AWS Nitro provides unique and industry-leading security and isolation by offloading the virtualization of storage, security, and networking resources to dedicated hardware and software. This enhances security by minimizing the attack surface and prohibiting administrative access while improving performance.</p> <p>All data in transit</p> | <p>Canada: Low</p> <p>Ireland: Non-material</p> |

| Sub-processor | Purpose | Personal Data | Transfer Destination | Mechanism of transfer | Supplementary Measures: Contractual, Organizational, and Technical | Risk |
|---------------|---------|---|----------------------|-----------------------|--|------|
| | | <p>Family members and Dependents</p> <p>Sensitive Personal Data can be included in survey response or form data and so AWS may store any of the following:</p> <p>Government/National ID (e.g. SSN, SIN), Driver's License number, Passport number</p> <p>Username and password, Authentication credentials</p> <p>Financial and Payment information (account log-in, financial account, debit card, or credit card number in combination with any required security or access code, password, or credentials allowing access to an account)</p> <p>Geolocation</p> <p>Race/ethnicity</p> | | | <p>between our secure datacenter facilities, availability zones, and regions is encrypted automatically at the hardware level. SurveyMonkey also utilizes AWS Key Management Services to control and manage our own keys within FIPS-140-2 certified hardware security modules. Regardless of whether data is encrypted or unencrypted, we will always work vigilantly to protect data from any unauthorized access.</p> <p>Our security team has carried out a comprehensive review of all AWS cloud infrastructure services and changes are kept under continual review.</p> | |

| Sub-processor | Purpose | Personal Data | Transfer Destination | Mechanism of transfer | Supplementary Measures: Contractual, Organizational, and Technical | Risk |
|---------------|---------|--|----------------------|-----------------------|---|------|
| | | <p>Religious/Political/Trade Union Affiliation</p> <p>Sex life or Sexual Orientation</p> <p>Health data (incl. prescription medications, medical procedures and tests, diagnoses, medical practitioners and area of practice, health card numbers etc.)</p> <p>Biometrics (e.g. fingerprints, voice recordings, photos)</p> <p>Genetic data</p> <p>Salary/Income (or ranges of same)</p> <p>Customer survey responses (responses received by a customer to the survey they create within SurveyMonkey accounts)</p> <p>Credit score/record</p> <p>Communications - the contents of a consumer's private communications, unless the</p> | | | <p>SurveyMonkey encrypts all data at rest in our data centres using AES 256 based encryption. Additionally, SurveyMonkey encrypts all data in motion using (i) RSA with 2048 bit key length based certificates generated via a public Certificate Authority, for communications with entities outside SurveyMonkey's data centres, and (ii) RSA 256 certificates generated via Internal Certificate Authority, for all the data within the data centre.</p> <p>These encryption efforts prevent the acquisition of data in an intelligible form This also deters wiretapping between the two end-points while such data is in transmission or in storage.</p> | |

| Sub-processor | Purpose | Personal Data | Transfer Destination | Mechanism of transfer | Supplementary Measures: Contractual, Organizational, and Technical | Risk |
